

Motion Sensor

DESCRIPTION

Managing operating costs and reducing energy consumption without sacrificing guest experience or guest comfort is realized using the Motion Sensor.

Integrating the Motion Sensor automatically adjusts room conditions when the room is unoccupied, while allowing guests the ability to have a more personalized in-room experience, including comfort, lighting and view. This helps you take control over energy costs, reduce operating expenses and continue to enhance guest satisfaction.

FEATURES

- Passive IR Sensor
- Easy installation
- Wall or surface-mounted installation
- 2-3 year battery life
- Best of breed

SPECIFICATIONS

SKU: PIR-300

Supported networks: Z-Wave (500 series chip) – Signal (Frequency) 908.42 MHz

Power requirements: Lithium Battery (CR-123A)

Range: up to 130ft (40m) indoors

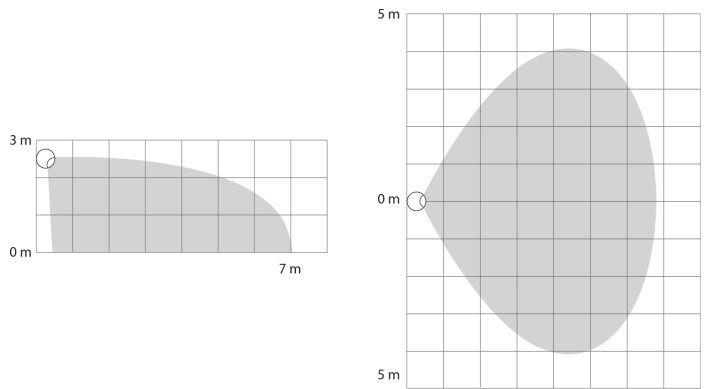

Recommended installation height: 7'-7/8" (2.4m)

Dimensions: 2.99" H x .66" W x .74" D

INSTALLATION

Detection Range

Detection range of the motion sensor is shown below. Actual range of the sensor can be influenced by environmental conditions.

Installation Location and Working Conditions

The motion sensor should be installed in a corner of the room or perpendicular to the doors.
